E-mail: _____

The Restriction on Hazardous Substances (RoHS) 2002/95/EC Directive was adopted February 2003 by the European Union. This Directive bans placing on the EU market any products containing more than agreed levels of Lead, Cadmium, Mercury, Chromium VI, PBB and PBDE.

REACH (Registration, Evaluation, and Authorization of Chemical Substances - EC1907/2006), was adopted December 2006. addresses the production and use of chemical substances, and their potential impacts on both human health and the environment.

In order to ensure our customers that we are meeting the requirements, we are asking our suppliers to self-evaluate their facilities and complete the following questionnaire.

1. Do you use any of the following materials at your facility **(Check all that apply)**
 - Lead
 - Mercury
 - Cadmium
 - Chromium VI (Hexavalent Chromium or CR6+)
 - Polybrominated Biphenyls (PBB)
 - Polybrominated Diphenyl Ether (PBDE)
2. **If you did not check any of the above, skip to Question 4**
3. Do you have a RoHS program in place that includes segregation of non-compliant materials from other materials, and precludes cross-contamination with other materials? **YES / NO**
4. Do you employ chemicals that are carcinogenic, mutagenic, toxic for reproduction, persistent or bioaccumulative in the processing of products and/or materials for CCI? **YES / NO**
5. Can you ensure materials/products/services purchased from your company will be free from any residual contamination from non-RoHS and/or non-REACH complaint substances? **YES / NO**

Please have a senior management representative sign and date below and return to Lisa Pittman via FAX: 203-744-6797. Thank you!

In signing below I am attesting that the above is a true and accurate representation of my company's practices:
